

```
print("hello guys!!..")

import random

while(True):

    n=int(input("select a number between 1
to 10\n"))

    r=random.randint(1,10)

    if(n==r):

        print("Your guess is correct")

        break

    else:

        print("Sorry,the lucky number
is",r,"and ur selected number is",n)

        print("So,please again select a
number between 1 to 10")
```
